

The **Heenan WEIGHbridge** – a tool for farmers to test and measure stock performance – is air operated – so you need a small compressor – 1hp is adequate – platform floor is 2.440 long – is independant from the walls – is covered with a material which makes it super quiet in operation and with no slipping or sliding – walls are 2.200 high inside – 2.500 oa.

There are two side exit doors and one front exit door enabling three way drafting.

IN PRACTICE IT WORKS LIKE THIS

You open the door from your yards to the **WEIGHbridge**.

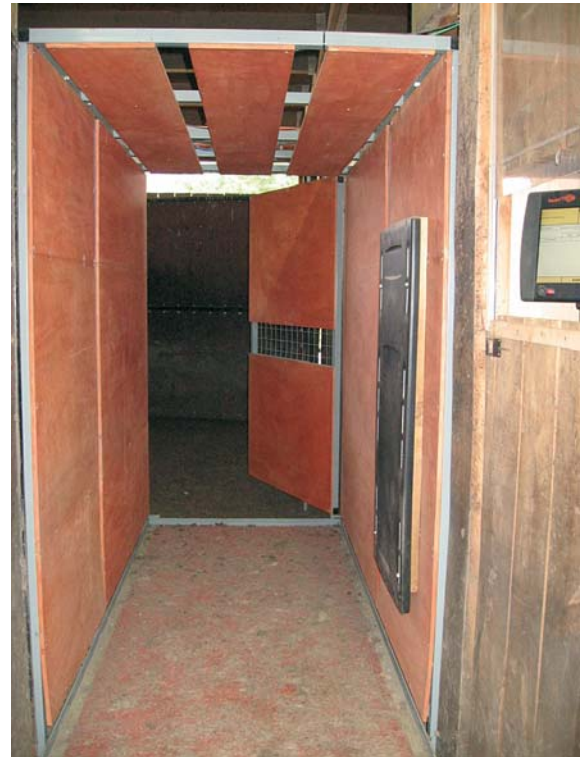

- As the deer enters:
- the EID reader identifies its number to the indicator (or you can start the weighing)
- it is weighed
- records are updated automatically and depending on the preloaded instructions (ie by weight or genetics) opens the appropriate exit door
- As the weight comes off the platform the exit door closes
- You are ready for the next deer
- The elapsed time is around 5 seconds

WHY DOES IT WORK SO GOOD ?

1. IT'S ROOMY – BIG on space – we learned from our **Workroom Deerhandlers** that deer will move into a room more readily than just a narrow race.
2. We believe there is just the right amount of light and the deer sense an opportunity to escape.
3. Quiet floor – sand over carpet provides a quiet – no noise surface for the deer to walk on.
4. Soft open - Soft close doors – no clanging or banging to spook the deer.

CLIENTS TELL US - one man can weigh and draft 200 weaners per hour with ease

- To identify those deer which gained weight more rapidly than others on the same feed – to identify non-performers and eventually their parentage
- To provide accurate information quickly and easily – enabling him to make those important management decisions affecting his business
- To manage his deer to meet the requirements of his works supply contract more efficiently and for a very much better financial return.

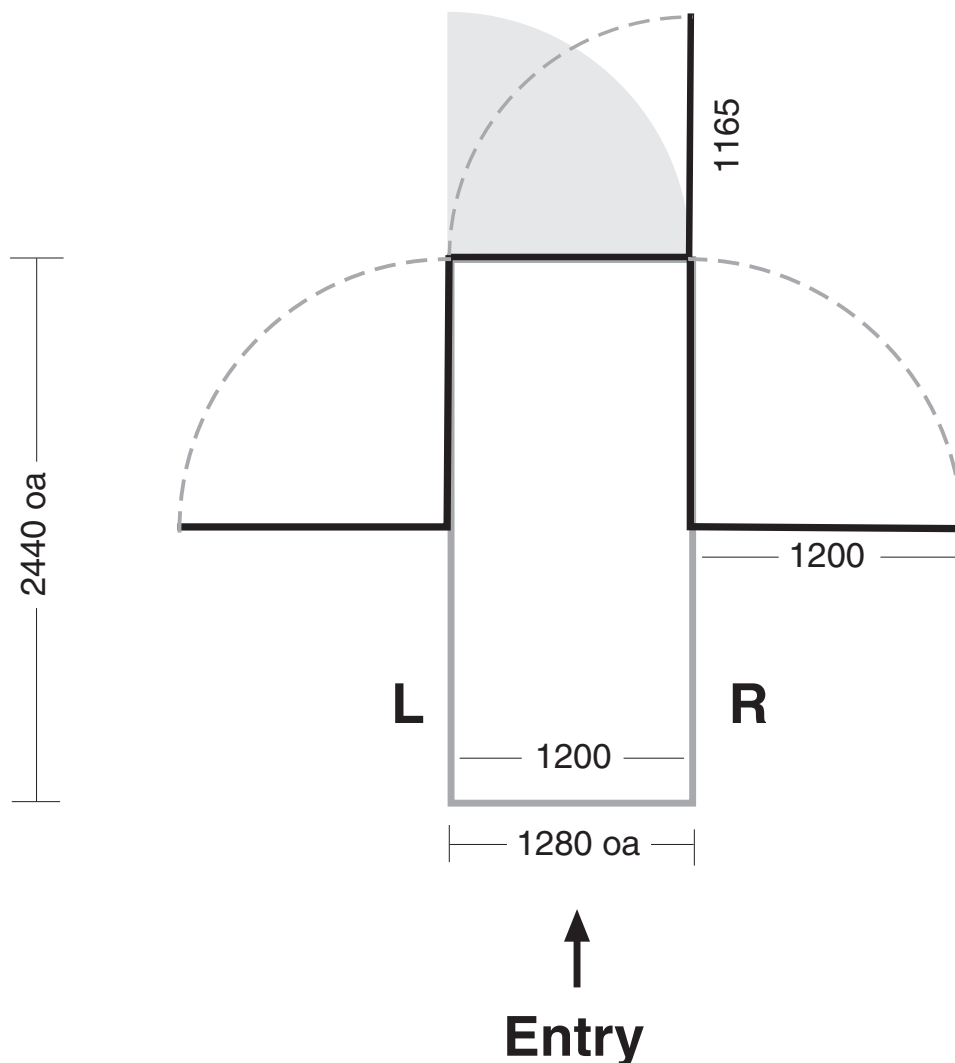

**WE INVITE YOU TO TAKE ADVANTAGE OF OUR EXPERTISE
AND THIS IMPORTANT DEER FARM MANAGEMENT TOOL**

Heenan **WEIGH** bridge

Is available with the following exit door options –
Just whatever best suits your yards.

ALL INCLUDE SOFT OPEN – SOFT CLOSE DOORS

Front door opens 90° clockwise or anti-clockwise.
